WHAT TO KNOW
BEFORE YOU BORROW

This brochure contains tips for reducing your expenses and the amount of money you may need to borrow while attending Western. We recommend that you read this brochure before accepting any loans.

What makes up your cost of attendance?

It's important that you understand the components that make up your cost of attendance (COA) so that you can identify ways to minimize your borrowing. A good place to start is by understanding the difference between fixed and variable educational expenses.

When determining how you can reduce the amount of money you need to borrow, consider that **tuition and fees are your only fixed expenses.** You have some degree of control over everything else. Your variable expenses include:

- **Room & Board** - If you live on-campus, consider which meal plan would best suit your needs. There are a variety of plans with different costs from which to choose. If you don’t plan to eat every meal in the dining hall, consider a reduced meal plan. Juniors and seniors often choose to live off-campus with roommates. If you make this choice, consider the cost of utilities, lease deposits, and transportation costs, as well as your legal rights.

- **Books & Supplies** - The AS Bookstore provides a variety of options for purchasing textbooks— their Verba price comparison shopping tool allows you to compare pricing on new and used books, rentals, and other online marketplace options. At the end of each quarter, you can sell the books you no longer need back to the bookstore for up to 50% off of the selling price.

- **Transportation** - Do you really need to bring your car? Gas, maintenance, and parking can be expensive. All students enrolled at least half-time (6 credits) on the Bellingham campus receive a WTA bus pass as part of their mandatory quarterly fees. Bring a bike and utilize the bus system.

- **Personal & Miscellaneous** - Develop a monthly budget for personal expenses like eating out and entertainment, and stick to it! Evaluate the necessity of having expensive cell phone plans – are you using all the minutes/data you pay for?

As you further evaluate other ways to fund your variable expenses, consider the resources outlined on the following pages before accepting all your loans.
Employment

Working during your university education is critical to assisting with your financing, as well as contributing to your future employability. On average, students who work during college are more likely to graduate, have higher grade point averages and gain the ability to demonstrate the skills that future employers expect from college graduates.

Start Now!

It is in your best interest to begin working now to save money for your educational costs at Western. If you are able, plan to work this summer. Having some employment history (paid, non-paid or volunteer) will help your marketability in applying for jobs at Western and in the Bellingham community.

For more information regarding employment opportunities on- and off-campus, visit the WWU Student Employment Center website: www.finaid.wwu.edu/studentjobs

Scholarships

Looking for additional resources to help with educational expenses? The WWU Scholarship Center is available to assist students and their families as they search and apply for scholarships. A scholarship is free money for college that doesn't need to be repaid. The total amount of scholarships awarded to Western students from all sources exceeds $8 million annually; almost $4.5 million of this is awarded as institutionally funded Western Washington University scholarships. The Scholarship Center maintains a website at www.finaid.wwu.edu/scholarships listing available WWU scholarships as well as scholarships from private donors.

Make sure you register at www.thewashboard.org, a free scholarship clearinghouse sponsored by the Washington Scholarship Coalition.

Scholarships Pay Off

Wondering if searching and applying for scholarships is “worth your time?”

Spend 10 hours searching and applying for scholarships

Set up a profile at www.thewashboard.org to make searching easier

Apply for 5 scholarships

By having your scholarship portfolio ready, you can apply for multiple scholarships at once

Receive one $500 scholarship

Even one $500 scholarship will make a difference

You just earned $50 per hour

Imagine how much you’d earn if you were selected for more than one scholarship

Build a scholarship portfolio!

Having application materials on-hand saves time and effort.

The following items are routinely asked for in scholarship applications:

Résumé – List your work, volunteer, and leadership experiences

Letters of Recommendation – Keep them updated throughout college

Transcripts – From other colleges

Completed FAFSA – Many scholarships require the FAFSA to be filed to assess financial need

Personal Statement – Academic and career goals, challenges and/or opportunities you’ve experienced

By the Numbers: It PAYS to work now!

Academic year: $11/hour x 10 hours/week x 30 weeks = $3,300

Breaks: $11/hour x 40 hours/week x 16 weeks = $7,400

Total: $10,340

Please note this calculation still leaves you with six weeks of rest during the year!

This amount can pay your tuition for the academic year, or your housing – and perhaps personal expenses depending on your consumer choices regarding rent and food.

Watch your expenditures and distinguish between what you truly need vs. what you want. Remember:

One who fails to live like a college student while in college may live like one after.”

- Ancient Financial Aid Proverb
Other planning resources

Forecast your starting salary for various careers by visiting the Bureau of Labor Statistics website at bls.gov/bls/blswage.htm. Use the Mapping Your Future Debt Calculator at mappingyourfuture.org/paying/debtwizard to help determine how much student loan debt you can manage based on your anticipated starting salary upon graduation.

*NOTE:* Student loan payments should be 8% or less of a student’s net monthly income after graduation.

Financial Awareness Counseling is an online resource developed by the Department of Education. It can provide you with the basics of financial management and information about your federal student loan debt, including a feature that can help you estimate what your student loan debt is likely to be when you leave school. This resource is available online at www.studentloans.gov.

National Student Loan Data System (NSLDS) is a national database that provides an integrated, centralized view of your Federal loans during their complete life-cycle. Use this database to review and monitor your loan debt throughout college. Access is available at www.nslds.ed.gov.

What else do I need to know?

Do you know that you can accept less loan than what is offered on your award letter? You may request reinstatement of previously declined loan at any point during the year. Eligibility will be determined based on cost of attendance and whether you are making satisfactory academic progress.

Remember that your consumer choices can greatly impact your need to borrow. It is recommended that you borrow funds to meet your actual expenses only, rather than maximizing your loan indebtedness for costs you may be able to cover through other means.

If you need to borrow, borrow conservatively! You may not need every dollar that is offered. For example, if you are not bringing a car to campus, you may not have transportation expenses and therefore, may not need to borrow money to cover that portion of your cost of attendance.

All future financial aid information will be sent via email to your official WWU email address. Check your account regularly for information that may be sent regarding your award.

Grants and waivers are free money that do not need to be repaid. If these funds appear on your award letter, accept them!

If you have been awarded scholarships that are not currently reflected on your award letter, be sure to factor that money in when examining your cost of attendance to determine how much you may need to borrow.

For Direct Unsubsidized Loans, interest begins accruing while you are in school. If possible, make your interest payments before the interest capitalizes (the interest accrues interest) to keep your principal loan balance from growing.

Alternative Educational Loans are available through banks, credit unions, and other private lenders. These loans require a separate application that you, the student, initiate with the lender of your choice. A credit check is also conducted. It is strongly recommended that students who apply for Alternative Educational Loans use a co-signer in order to obtain the best interest rates and terms.
Compare Your Loan Options

For first-time loan borrowers, additional information is required before you can receive your loan. Federal Direct Loan borrowers must complete a Master Promissory Note and Entrance Counseling at www.studentloans.gov. Perkins Loan borrowers will receive an email sent to their official WWU account from the Financial Aid Department regarding additional requirements.

Parent borrowers must complete a separate application (online at www.studentloans.gov) and pass a credit check. If the credit check is approved, parent borrowers must complete a Master Promissory Note online as well.
